 Ashvary1996  
<https://github.com/Ashvary1996>

 PortFolio  
<https://ashvary-gidian.netlify.app/>

## Skills

### Frontend Technologies

HTML5, CSS3, JavaScript (ES6+), React.js, Redux (Redux Toolkit), TypeScript(Basic), Next.js (Basic), Tailwind CSS, Shadcn UI, Acertainty UI

### Backend Technologies

Node.js, Express.js, JWT, Bcrypt, Redis, SSE (server-sent events), Google Apis and Services, Socket.io, Cookies, LangChain, Clerk

### Database

MongoDB, MongoDB Atlas, Mongoose

### DevOps & Deployment

Netlify, Vercel, Render, Linux VPS (Hostinger), PM2, CI/CD

### Tools & APIs:

Git/GitHub, Postman, Google APIs, Stripe, Razorpay

### Automation

Cron jobs, Excel automation, Google Sheet

## EDUCATION

### M.Com in Marketing Management

Danielson Degree College

70.56%

2020-2022

### PGDCA

🔗 SVS College

## SUMMARY

Accomplished Full Stack Web Developer (MERN Stack) with a year of experience in JavaScript (ES6+), React.js, Redux, Node.js, Express.js, and MongoDB. Skilled in RESTful API development, cloud deployment (VPS), and implementing secure JWT-based authentication. Demonstrated success improving system performance and delivering robust, user-friendly web applications.

## EXPERIENCE / TRAINING

### Viacerta Abroad

Backend Developer

March 2025 - July 2025

Remote (Gurugram , Haryana)

🔗 <https://viacerta-unofficial.vercel.app/>

- Developed a production-grade backend using the **MERN stack**, integrating **JWT authentication**, **Bcrypt**, **Socket.io**, **Redis**, and **Google APIs** (OAuth, Sheets) to power blogs, courses, inquiries, chatbots, and support ticket systems.
- Engineered secure **RESTful APIs** with Express.js, enabling **real-time communication** via Socket.io, file upload/download workflows, API rate-limiting, and automated Google Sheets integration —improving operational efficiency by 60%.
- Achieved ~80% faster **API performance**, strengthened **app security**, and eliminated manual data processes through **real-time automation and caching**.

### SellerPundit

Software Developer Intern

Sep 2024 - Oct 2024

- Reconstructed the backend using a modular **Node.js/Express MVC structure** for better scalability and reduced deployment complexity by 35%.
- Automated email workflows using Nodemailer and streamlined data handling by building Excel import/export utilities with ExcelJS—reducing manual reporting tasks by 50%.
- Resolved **high-priority bugs**, optimized redundant logic, and accelerated developer onboarding by 40% through improved code clarity and documentation.

## PROJECTS

### Tripzy-AI

August 2025 - October 2025

🔗 Link : <https://tripzy-ai.vercel.app/>

- Developed an **AI-powered trip planner** using Next.js, React, Tailwind CSS, and MongoDB with **Google Gemini Api** and **LangChain** for personalized travel itineraries.
- Integrated **Clerk authentication**, **Arcjet rate limiting**, and 3D globe visualization for secure and interactive trip management.
- Delivered a responsive, **dark-mode-enabled** UI deployed on Vercel, improving performance, scalability, and user engagement.

Tech Stack: Next.js, Tailwind CSS, AccertaintyUi, ShadCn, LangChain, MongoDB, Clerk, Arcjet

### E-Com-App

Feb 2024 - 28 May 2024

🔗 Link: <https://ecom-app-by-ashvary.netlify.app/>

- Developed a full-stack e-commerce platform using React, Redux -Toolkit, Tailwind CSS, Node.js, Express, and MongoDB—improving user navigation and reducing cart abandonment by 30% through seamless browsing, purchasing, and **admin management** across all devices.
- Secured authentication with **JWT**, embedded Razorpay for compliant payments, and added **account recovery** using Nodemailer, Formik, and Yup, boosting checkout and recovery rates by 25% and 30% respectively.
- Optimized product search and UI performance, reducing search response times by 40%, while delivering a responsive and unified experience for both **customers and administrators**.

Tech Stack: Node.js, MongoDB, Tailwind CSS, REST APIs, Razorpay Payment Gateway, Postman

### Red Bus - Clone

March 2024 - April 2024

🔗 Link: <https://red-bus-by-ashvary.netlify.app/>

- Launched a responsive **bus reservation platform** using React, Tailwind CSS, Redux Toolkit, Node.js, and MongoDB with features for search, booking, and ticket management.
- Built **Express.js RESTful APIs**, scaled the UI for high traffic, and connected **Stripe** to process transactions securely—reducing checkout errors by 30%.
- Improved performance with a 30% load time reduction and increased form submission rate by 20% via **Formik/Yup** validation.

Tech Stack: ReactJS, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs, Stripe
